## MSA NAMES NEW CHIEF OPERATIONS OFFICER

**RICHLAND, Wash.** - Frank Armijo, president and general manager of the Mission Support Alliance, LLC (MSA), a Lockheed Martin/Jacobs/WSI Company, announced today the selection of David Ruscitto as MSA's Chief Operations Officer.

"Dave was selected to fill this critical role based on the strength of his technical and management experience, including his success in supporting a wide variety of customers, both nationally and internationally," said Armijo. "He understands the Hanford environment, and we're looking forward to him joining our team."

Ruscitto has over 34 years of experience in nuclear and civil engineering design, project management and construction management for both commercial and government clients. Formerly he led the K-Basins project and also served as president and CEO of Fluor Hanford.

David Ruscitto

"I look forward to joining the Mission Support Alliance team," Ruscitto said. "I also recognize the significant role the Mission Support Alliance has in supporting Hanford's future success and welcome the opportunity to make a difference."

Ruscitto will assume the Chief Operations Officer position effective August 30, 2010.

###

**About the MSA**

The Mission Support Alliance is a team led by Lockheed Martin, Jacobs Engineering and WSI, and has responsibility for the Mission Support Contract at the Hanford Site. The MSA team provides a number of cross-cutting services to the DOE and other contractors at the Hanford Site such as site infrastructure and utilities, logistics and transportation, environmental integration, safety, health and quality, interface management, emergency services and training, strategy and external affairs, information management and portfolio management.
